CROSBY S. NOYES Editor.

Reading Matter on Every Page. Average sworn Daily Circulation over 17,500,-being more than three times that of any other daily paper in Washington, and more than that of all the others added together.

Wir Advertisers well greatly chies us and at the Same time serve their own purposes best by sending in their advertisements before 12 o'eloch M. each day. and as much earlier than that hour as possible. Bxcept in extremely ursent eases, advertisements recered at the affice after 12 o'clock cannot appear the

The Star for the Summer. Persons leaving the oily may have THE STAR send to their address by mail, postage prepaid, for such period of time as they may desire. as the rate of 15 cents per week, 60 cents per month, \$1.75 for three months or \$3 for six menths.

By The money to pay for the time required must to all cases accompany the order. Otherwise the paper cannot be sent.

Blaine Breaks Ground on a New Line. The Woodstock speech by Senator Blaine yesterday is destined to have a wide notoriety. He evidently intends it as the keymote for the coming campaign of the straightout republicans. Though not a direct attack mpon the Administration, as was the formal indictment of the President's policy by Gov. Chamberlain, it will be readily seen that it is a shrewd appeal to the Union sentiment and war animosities of the north and west against the alarmingly portrayed phantom of another secession of southern states, reinforced from Mexican territory. He makes the most in this way of all the Bourbes utterances of state rights doctrine by the Ben Hill style of southern men, and be paints with undeniable force the undesirable nature of the voting population to be obtained by an accession of Mexican territory, but we doubt not that on cool second Thought the people of the north will conclude that the Maine Senator is crying wolf with-

.... General regret will be felt in all circles here-medical, scientific, literary and social -over the loss of Dr. Nichols, who resigns his position as superintendent of the Government Insane Asylum to take a similar but better paid position at the Bloomingdale Asylum. We suppose there can be no question that Dr. Nichols, by reason of profes-Bional ability, temperament, qualities of mind and heart, and intimate knowledge of mental disease, is without a superior, if he has a peer, in fitness for the care of the insane, and therefore, however fortunate the Government may be in selecting his successor, it can hardly hope to readily fill his

out sufficient cause, and that he is merely

reviving the sectional battle shout of 1875

that proved of such service to him in the ad-

vancement of his political fortunes.

The Turks really seem to have gained some successes near Kars, but not enough to afford them any hope of being able to resist for any length of time the steady advance of the Rus- SELLING OFF AT COST Bians, either in Asia or on the line of the Danube. In the latter quarter, where the main moves of the game are to be made, the Russians are apparently masters of the situation, having with little loss of life effected the crossing of the Danube, and seized such Etrategic points of advantage as to enable them apparently to maneuver the Turks out of the Balkan line of defences, and compel the latter to make their last desperate stand at Shumla, within easy reach of Constanticople. In the last contest between Russia and Turkey twenty-four years ago, the Russians were occupied several months in effecting the crossing the Danube, and only succeeded after a heavy loss of life. It is 2rue that the conditions were different then, and that Turkey had several of the great European powers at her back, but giving this fact all due weight, it yet seems apparrent that there has been a steady deterioration in the vitality and fighting capacity of the Turks in that period.

A member of the board of Indian commissioners reports that the Indian goods now being delivered under recent contracts are fully up to the samples submitted with the bids, and in some instances better. It will now be the duty of the Indian office to see that all of the goods, as they are delivered From time to time, are of the same character. The failure of the government to see that proper supplies were furnished at the Red Cloud agency a couple of years ago, cost the country a large amount of money to pay the expenses of an investigation, and came near costing an Indian war. Let the contractors in every case be compelled to furnish just such articles as they are paid to supply.

When it is a particularly dry time for news in Washington the sensational correspondent either invents a cabinet change or a story of a pestilence. The correspondent of the New York Herald sends to that paper the details of a frightful epidemic that has been prevailing here, quite unknown to the physicians or the public. "The sickness is so widespread and distressing," he says, "that people are often taken ill with vomiting or nausea in the streets and compelled to Beek remedy in the nearest drug store; the crush for quinine is likely to exhaust the Blocks in most of the retail drug stores," and nn conclusion he declares that "it is fortumate that the extra session of Congress was not called to meet next Monday." Inquiry at the health office shows that there is not the slightest foundation for this story. The city is exceptionally healthy for the season, and even the usual mortality among children at this time of the year has not shown itself. The low death rate also shows most conclusively the falsity of the statement.

Senator Blaine is generally supposed to Sknow what he is about, but in the opinion of some he is not particularly select lately in his choice of company. Just why he should travel all the way from Maine to New Jerknow what he is about, but in the opinion of travel all the way from Maine to New Jersey and Connecticut this sweltering weather to hob-nob with "off-color" statesmen like Pobeson and Chamberlain, is not apparent to ome of his admirers.

h. ' a year passes without the loss of several I wes at Niagara Falls. On the 1st instant, wo men boating in the river above the falls got into the rapids, and in attempting to sw.m ashore were carried to death below. It some strange that some precaution is not taken to prevent these accidents. Once in the rapids and human means are powerless to save the struggling victim of his own carelessness. A simple rope stretched just above the water from shore to shore at a point above the falls might be the means of saving many lives. It would be well if our there and devise some way to save those who, through ignorance or carelessness, find Shemselves being born irresistibly down the current.

The Washington correspondent of the New York Tribune states that a republican who has examined the roll of the next House of Representatives, as made up by Clerk Adams, says that the list stands-democrats, 152; republicans, 134. There are seven vacanries to be filled, and admitting that they are filled by republicans the democrats will still have eleven majority.
